

F.O. Splicing Tray

12-core Fiber Splicing Tray

Features

Splice tray is used in optical distribution frame, distribution box, and splice closures, which is engineered for use with indoor or outdoor splice hardware with both loose tube and tight-buffered optical cable designs. The compact splice cassettes designed for simple, cost effective low and mid-sized fiber splicing applications. Each cassette is supplied with splice holders that secure and protect both fusion and mechanical splices; also the top cover is included.

- The fusing distribution board of the unit box is double layer structure, integrating the fusing and distribution into one unity.
- Made from aluminum, lightweight and durable.
- Protect and manages fiber splices.
- Can be mounted on LINK FDU Rack mount or Wall mount.
- Use for single-mode or multimode fiber.
- Easily disposed for particular needs.
